52-200 Wrocław 65

## REFERENCE

I hereby confirm that we have cooperated with TransAuditors.eu Sp. z o.o. during ISO 28 000 implementation (security management system for the supply chain) in our company, which was a requirement of one of our clients.

The representants of TransAuditors.eu carried us successfully through all the stages of the system implementation, which culminated in the fact that we obtained the ISO 28000 certificate in September 2018 issued by the Independent Assessment and Certification Body - United Registrar of Systems Polska Sp. z o.o.

TransAuditors is a team of professional advisers who specialize in following areas: process optimization in the supply chain, risk management and security risk analysis in the supply chain.

TransAuditors' consultants know the road transport industry very well and are able to make a proper analysis of the current state of the company.

I wholeheartedly recommend the cooperation with TransAuditors.eu.
